

Lifting Belt Sling

Be safe with the strongest lifting belt slings

For heavy loads up to 500 tonnes

With the new generation of lifting belt slings from Lift-TEX® you can lift loads of up to 50 tonnes absolutely safe - according to EN norms 1492- 1/2 with a safety factor of 7:1!

This truly outstanding development is based on a new manufacturing technology with a totally new construction allowing a larger lifting area of the belt with shortened soft eyes.

Features:

- Strong core
- Highly abrasion & cut resistant protection sleeve
- Double the service life of normal lifting slings
- Longer life when lifting materials with sharp edges such as steel- and aluminium coils, steel pipes, steel bars, plates

Lifting belt slings & lifting mat slings

The new Lift-TEX® lifting belt slings are available in width from 30 to 300mm and the lifting mat slings for pipelines in width up to 900mm. Two soft, reinforced eyes on each end for easy crane hook handling. Special abrasion resistant cut protection sleeves are also available in the required length.
